The European Space Law (EUSL)

What is the European Space Law (EUSL)?

On the 13th of September 2023, in the State of the Union, President von der Leyen presented Commission priorities for 2024.

The Letter of intent included **an initiative for an EU Space Law (EUSL)**. The legislative proposal envisages common EU rules addressing the **safety, resilience and sustainability** of space activities and operations. It intends to **avoid and remove fragmentation and barriers** across the single market caused by the heterogeneity or lack of national space legislations, while ensuring the competitiveness of the European space sector in an international trade context.
